- Backend Development: RESTful API Design, MVC Architecture, Object-Oriented Programming (OOP)
- Frontend: HTML, CSS, Bootstrap, jQuery, AJAX
- Database: MySQL (Query Optimization, Schema Design)

Framework: CodeIgniter

Version Control: Git, Bitbucket

- Tools: VS Code, Sublime Text, XAMPP, FileZilla

Professional Experience

PHP Developer

C2Perform (Remote) | Feb 2023 – May 2026

• Developed and maintained CodeIgniter-based modules using MVC architecture, reusable libraries, helpers, and models. Delivered performance management platform modules for US-based clients. Designed and optimized backend logic and MySQL queries, enhancing application performance and response time. Implemented dynamic features using AJAX, improving real-time data handling and user experience. Collaborated with QA and cross-functional teams in agile development cycles. Identified and fixed critical bugs, boosting system stability and reliability.

PHP Developer

Giggada Technology Pvt. Ltd., Pune | Jun 2017 – Apr 2022

• Developed and customized CodeIgniter applications, including controllers, models, views, validation, and database-driven modules. Delivered 10+ web applications across domains such as EdTech, Real Estate, and E-commerce. Designed and developed admin dashboards and multi-role user systems. Built and integrated secure payment gateway solutions. Developed REST APIs for mobile and web applications. Designed and optimized MySQL databases for performance and scalability.

Key Projects

- Performance Management System (US Client Product)
- Developed a role-based web application for employee performance tracking, incentives, and reporting.

Implemented Admin, Manager, and Employee dashboards. Improved responsiveness using AJAX-based dynamic data loading.

- Naukari Suchak Kendra (Job Platform)

- Built a multi-role platform (Admin, Business Developer, Center, Candidate). Integrated payment gateway for candidate services. Developed APIs for mobile application integration.

Ybrant Institute (EdTech Platform)

- Developed modules for admissions, fee payments, and assignment management. Designed admin panel for managing students, courses, and fee structures. Implemented secure database and backend architecture.

Indorents (Automobile Platform)

- Built a platform for vehicle rental and sales management. Developed booking system and admin dashboard. Created APIs for user operations and service listings.

Additional Projects

- RealtySpace – Real estate listing and management platform. HeyTrends – Technology news and blogging website. Bhavya Divya – Backend APIs for mobile news application. IBAT – Training institute platform with payment integration. Winehouse – E-commerce backend APIs and admin dashboard.

Achievements

- Recognized by clients for timely delivery and high-quality development. Successfully delivered multiple production-ready applications. Strong problem-solving skills with a focus on performance optimization.

Education

- MCA (Science) – Solapur University, 2016
- BCA – Solapur University, 2014

Certifications

- PHP & Web Development (HTML, CSS, JavaScript, jQuery, Bootstrap, MySQL)

Volunteer experience

- Employee of the Month – Giggada Technology Pvt. Ltd. | February 2019 – Recognized for outstanding performance, dedication, and contribution to project objectives
